Are your students really struggling with writing sentences?

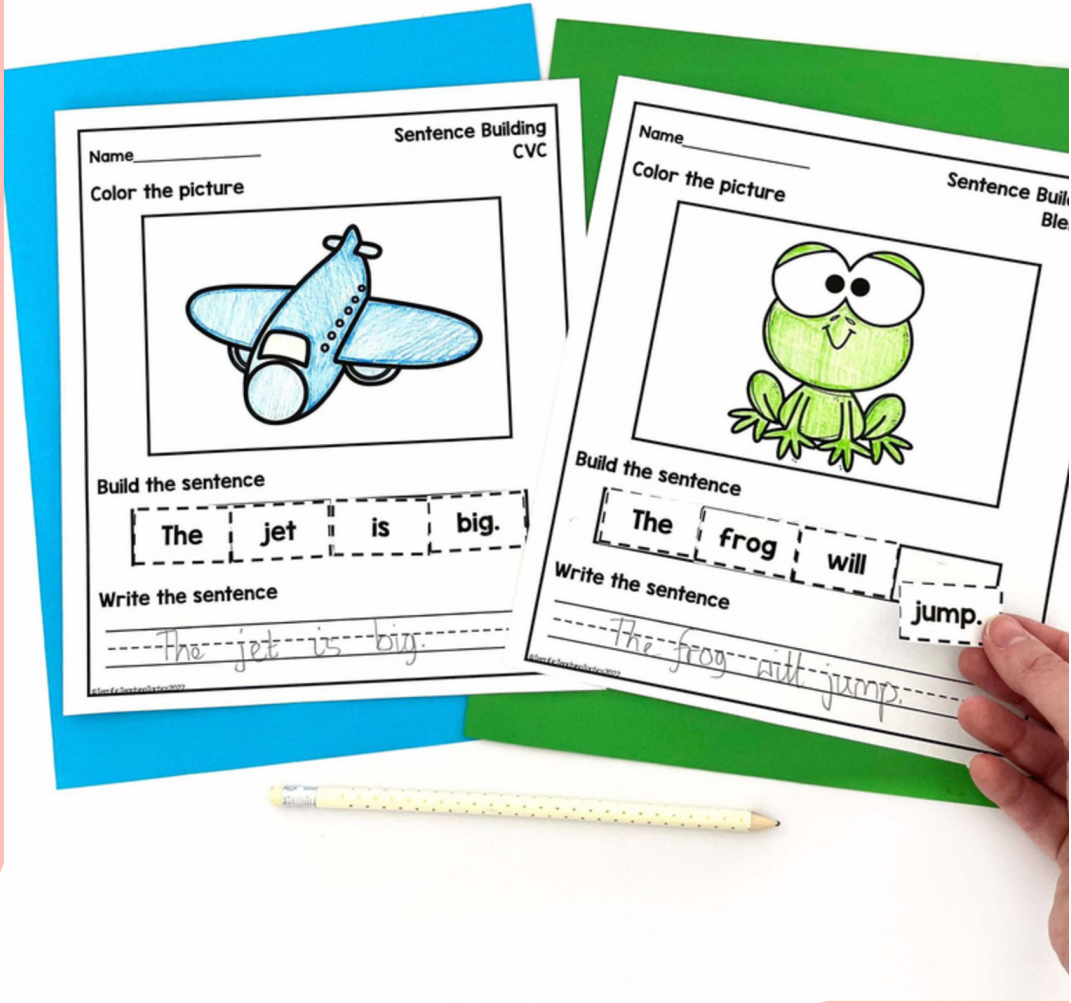

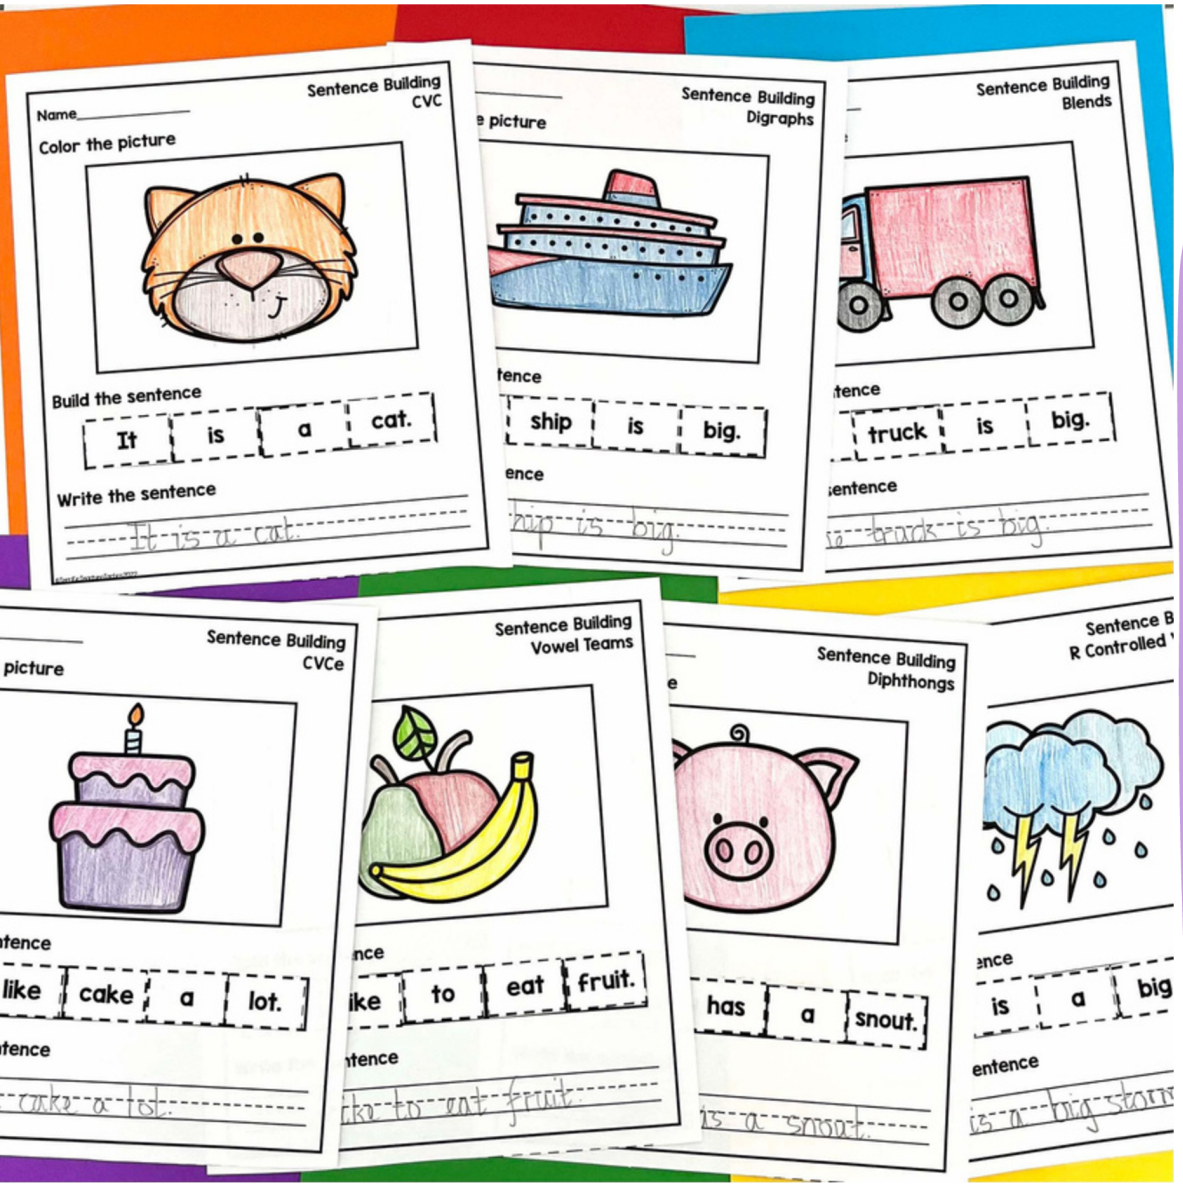

Perhaps they need practice with sentence structure, handwriting, fine motor and sight words too.

This is where sentence building activities are perfect!

But what if your students really struggle with reading and need to practice decoding?
What if the sentence building resources on TPT are full of words that are too hard for them to decipher?

**These decodable (science of reading aligned) worksheets are exactly what you need!**

“I’m obsessed with these! There are so many mixed up sentence products on TPT and I’ve used many of them, but looking back I realized how impossible the word choices were! My students can actually read these words & figure out the sentence on their own instead of just copying something without reading it. Genius!”
Christine S.

There are 7 sets of worksheets:

- CVC
- Digraphs
- Blends
- CVCe
- Vowel Teams
- R Controlled Vowels
- Diphthongs

Each set has 40 worksheets (280 total)!

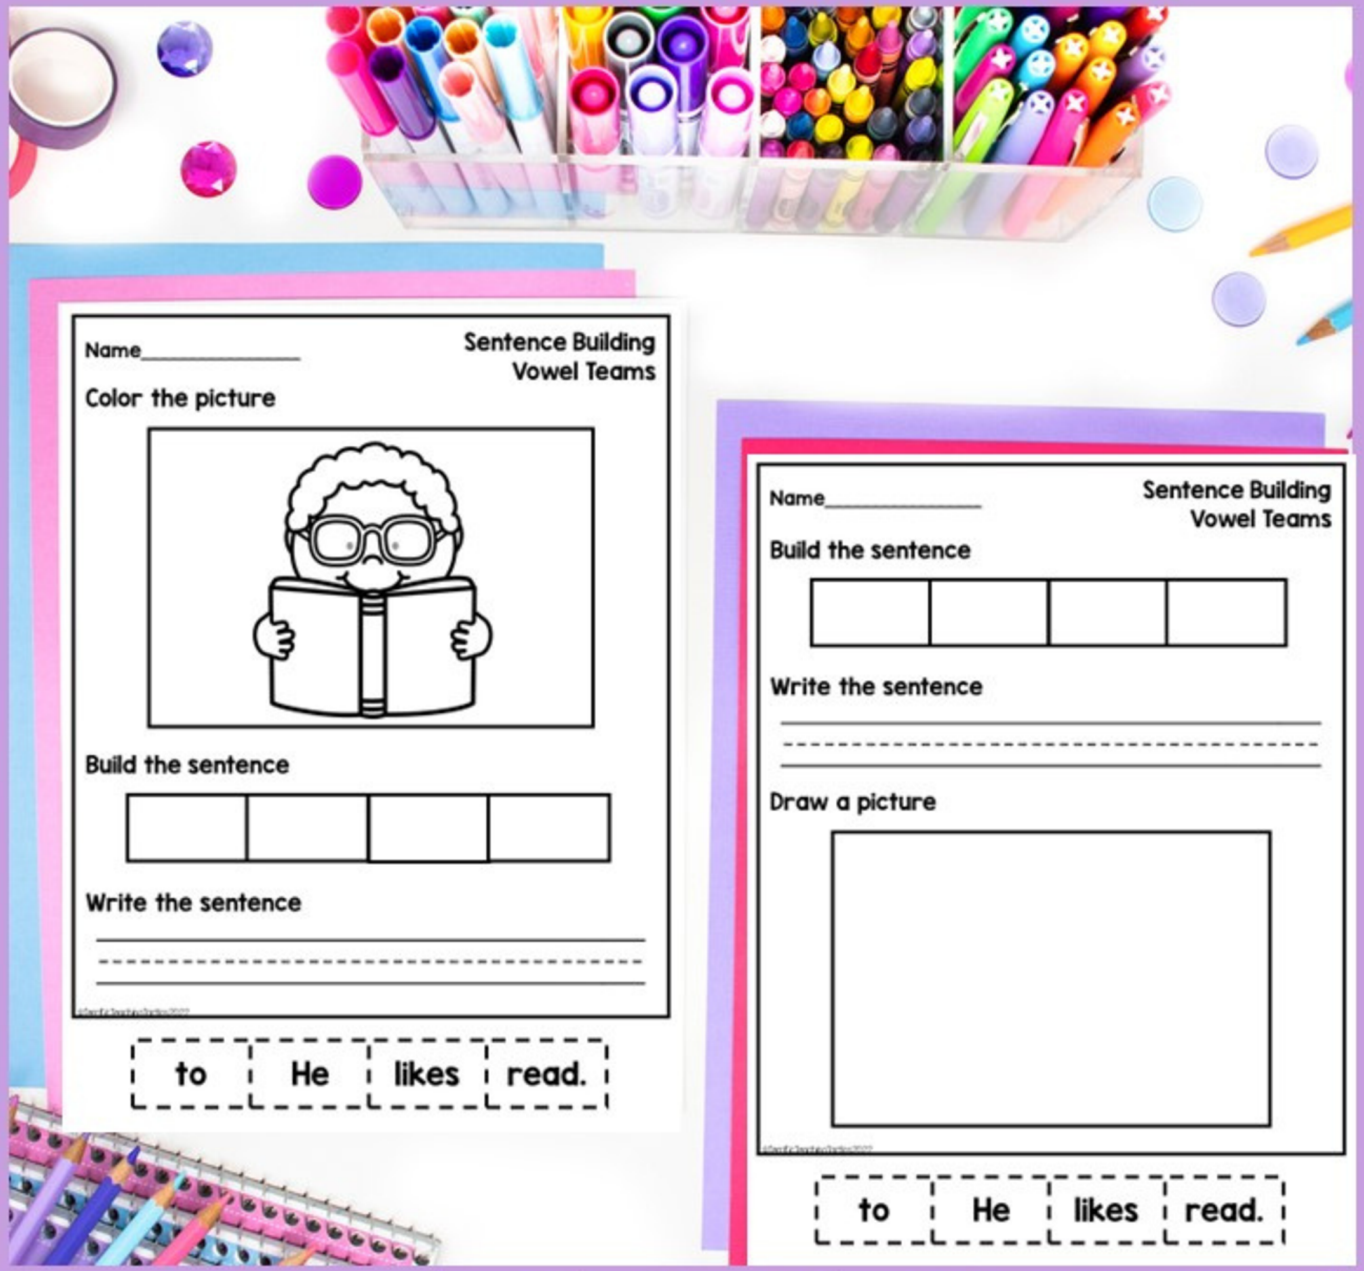

# How other teachers are using these activities:

"I used these for homework and extra practice in my kindergarten class. I love that they are decodable!" - Julia R.

"This is one of my favorite purchases on tpt ever!! I use this for goal work progress monitoring with my students that have special needs." - Nicole A.

"My students enjoy using this resource as a literacy center!" - Mikayla L

"Awesome resource for my ESOL students!" - Gigi E.
